DETAILED ACTION

The finality of the office action mailed December 02, 2003 has been withdrawn.

The Election/Restriction mailed April 30, 2004 has been withdrawn. The following Election/Restriction sets forth the time period for response.

Election/Restrictions

This application contains claims directed to more than one group of compounds with a distinct chemical core of the generic invention. These groups are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The groups with a distinct chemical core are as follows:

Carbohydrates, alcohols, aldehydes and non-carbohydrate polyhydroxy compounds.

Applicant is required, in reply to this action, to elect a single group to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected group, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Applicants are reminded that the present requirement within a single claim is done so under the authority *In re Harnisch* USPQ 300, 305 CCPA. *In re Harnisch* indicates that restriction would not be proper within a single claim when the claimed embodiments share a common utility and a common structure feature disclosed to be essential to that utility. Applying this test in this case, the claimed embodiments have a common utility but lack a common

structural feature disclosed to be essential to that utility. Therefore, the restriction requirement of the instant application is considered to be proper under *In re Harnisch*.
